UG (NEP) 7th SEMESTER
Computer Applications: Java Programming
(CAP722J2)

No. of Questions: 09 Session: February 2026
Time Allowed: 2:00 Hours Max. Marks: 100 Min. Marks: 36

NOTE: Attempt all questions from Section “A” and “B” and only two questions from Section “C”.

Section A: Short Answer Type Questions (8 × 2 = 16 Marks)

Answer all questions in a maximum of 20 words each.

i. What various levels of scope of variable in Java programming?
ii. What is meant by manipulation of string?
iii. Write the syntax of a simple Java program that prints a message.
iv. Give an example of implicit type conversion in Java.
v. Write a Java statement to declare a one-dimensional integer array.
vi. What is wrapper class?
vii. Define the purpose of “throw”?
viii. Name three built-in exceptions.

Section B: Medium Answer Type Questions (4 × 10 = 40 Marks)

Answer all the four questions with internal choice in a maximum of 150 words each.

2. Write complete Java program to find minimum and maximum value in array.

OR

Demonstrate the use of nested if statement by finding greatest of 3 variables.

3. Write a Java program to accept the input from keyboard and store that in file?

OR

Demonstrate the working of constructors in Java with proper example.

4. Discuss Method Overriding with proper example.

OR

Explain the concept of packages in Java. Demonstrate with an example?

5. Write a program to demonstrate user defined exceptions.

OR

Write a Java program to demonstrate creation of multiple threads?

Section C: Long Answer Type Questions (2 × 22 = 44 Marks)

Answer only two questions in a maximum of 400 words each.

6. Explain, with syntax, various program control statements in Java.
7. Write a complete Java program to demonstrate passing of Objects as parameter.
8. Explain dynamic method dispatch with suitable example?
9. Demonstrate difference between the Thread class and Runnable interface with suitable example(s).
