UG (NEP) 8th Semester

APPLIED COMPUTING – CLOUD COMPUTING

(ACP822N)

SESSION: JUNE/2026

Time Allowed: 2:00 Hours	Max. Marks: 75	Min. Marks: 27

NOTE: ATTEMPT ALL QUESTIONS FROM SECTION “A” & “B” AND ONLY TWO QUESTIONS FROM SECTION “C”.

SECTION – A: SHORT ANSWER TYPE QUESTIONS (8 × 1.5 = 12 Marks)

Answer all questions in a maximum of 20 words each.

1. (i) What is Cloud Computing?

(ii) Define IaaS.

(iii) What is PaaS?

(iv) What is SaaS?

(v) What is virtualization?

(vi) Define virtual machine.

(vii) What is scalability in cloud computing?

(viii) Name any two cloud service providers.

SECTION – B: MEDIUM ANSWER TYPE QUESTIONS (4 × 7.5 = 30 Marks)

Answer all the four questions with internal choice in a maximum of 150 words each.

2. Explain the characteristics and benefits of cloud computing.

OR

Explain different cloud deployment models with suitable examples.

3. Explain IaaS, PaaS, and SaaS with examples.

OR

Describe major cloud service providers such as AWS, Azure, and Google Cloud.

4. Describe the architecture of cloud infrastructure with appropriate diagrams.

OR

Differentiate between virtual machines and containers.

5. Describe reliability, availability, and security in cloud services.

OR

Explain scalability and elasticity in cloud infrastructure.

SECTION – C: LONG ANSWER TYPE QUESTIONS (2 × 16.5 = 33 Marks)

Answer only two questions in a maximum of 400 words each.

6. Explain cloud computing in detail. Discuss its characteristics, advantages, challenges, and deployment models.

7. Explain virtualization in cloud computing. Discuss types of virtualization and the benefits of virtualization in cloud infrastructure.

8. Describe cloud infrastructure and data center architecture. Explain servers, storage, networking, scalability, and elasticity in cloud computing.

9. Explain the performance and scalability characteristics of services deployed in a cloud environment.
